Microsoft Certified: Azure AI
Engineer Associate

Truong Son Nguyen

--

Ho Chi Minh City, Vietnam

Summary

Senior Full-stack Developer with 14+ years delivering platforms across .NET, Python, and Node.js. I modernize legacy systems, lead squads, and ship cloud-ready services on Azure/AWS/GCP. Comfortable from backend APIs and messaging to SPA frontends (React/Next.js). Strong SQL foundations, testing culture, and CI/CD. I leverage AI tools and LLM prompting to speed up delivery. Azure AI-102 certified. Highlights: • Architected Homework AI, an AI-powered Socratic tutor utilizing FastAPI, React, and GPT-4 Vision with a Pinecone-backed RAG pipeline for real-time curriculum-grounded guidance. • Engineered curriculum-plan-rag, a multilingual RAG pipeline integrating OCR-aware ingestion, structure-aware chunking, and Qdrant vector search with LlamaIndex and Hugging Face embeddings. • Automated large-scale curriculum data ingestion utilizing Apache Airflow, Azure Blob Storage, and incremental checkpointing. • Architected LingoSafe Tutor, an AI language assistant utilizing LangChain/LangGraph, integrating real-world APIs with pedagogical guardrails and PII sanitization. • Implemented advanced AI safety mechanisms using a Llama-Guard Jailbreak Classifier and ChromaDB to ensure child-friendly responses and prevent data leaks. • Built a background Python orchestrator integrating Trello and GitHub using OpenAI for intelligent task routing and workflow dispatching. • Engineered an open-source FastMCP server (linkedin-cv-updater) using Python and Playwright to enable AI agents to automate LinkedIn profile updates. • Built Vectors, a collaborative voice-reading platform using Next.js 14, React 18, and TypeScript, featuring ensemble recording and podcast publishing. • Delivered Audiostamps, a full-stack Node.js e-commerce platform bridging physical objects and digital memories via QR codes, AWS S3, and PayPal. • Led a 3-dev squad on an Azure automotive platform with real-time SignalR. • Migrated legacy apps to .NET 6/Blazor and React, improving maintainability. • Built high-throughput e-commerce integrations with Kafka, RabbitMQ, and Odoo. Technologies: C#, .NET 6, ASP.NET Core, Blazor, Python, Django, FastAPI, Flask, Node.js, Express, TypeScript,

Next.js, React, Redux, REST API, SQL Server, PostgreSQL, MySQL, Cosmos DB, Pinecone, Azure, AWS, GCP, SignalR, Kafka, RabbitMQ, CI/CD, Docker, OOP, Agile, LangChain, LangGraph, LLMs (OpenAI, Hugging Face), LlamaIndex, Qdrant, ChromaDB, Apache Airflow

Experience

Homework.ai

Senior Full-stack Developer

August 2025 - Present (11 months)

Ho Chi Minh City, Vietnam

- Architected and developed Homework AI, an AI-powered Socratic tutoring application utilizing React, TypeScript, FastAPI, and PostgreSQL.
- Integrated GPT-4 Vision for OCR and problem extraction (handwriting and math equations), and GPT-4 for guided Socratic questioning and progressive hints.
- Designed a real-time tutoring WebSocket server and engineered a Retrieval-Augmented Generation (RAG) pipeline leveraging Pinecone and Airflow for curriculum grounding.

Open Source

Creator / Software Engineer

May 2026 - Present (2 months)

- Engineered an open-source FastMCP server integrating AI agents with LinkedIn to automate profile updates.
- Architected a secure CDP (Chrome DevTools Protocol) automation solution using Playwright to bypass API rate limits and CAPTCHAs via local browser connections.
- Packaged and distributed the project globally using GitHub Actions and pre-compiled wheel binaries.
- Leveraged Python 3.10+, Pydantic, and FastMCP to expose robust tools and prompts directly to the IDE.

Personal Projects

AI Engineer

April 2026 - Present (3 months)

Ho Chi Minh City, Vietnam

- Architected and developed LingoSafe Tutor, an AI-powered language learning assistant in Python utilizing LangChain/LangGraph for complex orchestration loops.
- Integrated real-world APIs with strict pedagogical guardrails and PII sanitization to ensure child safety.
- Implemented advanced AI safety mechanisms including a Llama-Guard based Jailbreak Classifier to block adversarial inputs.
- Built output guardrails to ensure child-friendly responses and prevent data leakage, backed by ChromaDB for storing kid-friendly curriculum documents.

my-coding-agent (Open Source)

Creator / Automation Engineer

March 2026 - Present (4 months)

- Architected a background Python orchestrator integrating Trello and GitHub, leveraging OpenAI models for intelligent keyword-based repository routing and task tracking.
- Engineered automated workflows to dispatch GitHub Actions implementation jobs upon Trello ticket creation and synchronize PR states back to Kanban boards.
- Streamlined operations with an event-driven architecture using python-dotenv, openai, and github-copilot-sdk to drive developer productivity.

Repo: <https://github.com/sonnguyent1/my-coding-agent>

Curriculum Plan RAG Project

AI Software Engineer

September 2025 - Present (10 months)

- Engineered a multilingual (English/Vietnamese) Retrieval-Augmented Generation (RAG) pipeline for curriculum documents utilizing LlamaIndex, Qdrant, and Hugging Face embeddings.
- Developed an OCR-aware data ingestion system with PyMuPDF, Unstructured, and Tesseract, incorporating automated Vietnamese NFC normalization and text cleanup.
- Implemented a structure-aware chunking algorithm utilizing heading and section detection to preserve semantic context and enrich chunks with educational metadata (grade, subject, chapter).
- Automated scalable, incremental data ingestion workflows using Apache Airflow, JSON checkpointing, and Azure Blob storage.
- Integrated a transparent answer generation layer that provides inline citations and tracks end-to-end retrieval latency using Langfuse.

Audiostamps

Full Stack Developer

June 2025 - Present (1 year 1 month)

Ho Chi Minh City, Vietnam

- Architected and developed a full-stack web application enabling users to scan physical QR-code stickers to record, save, and listen to voice messages directly in the browser.
- Engineered a robust e-commerce and fulfillment pipeline integrating PayPal checkout with automated IPN webhooks.
- Built a highly reliable background worker system using Bull and Redis to handle asynchronous task execution, including dynamic PDF label generation, audio format conversions, and automated email notifications.
- Implemented an advanced internal admin dashboard using AdminJS and Sequelize to manage orders, trigger manual fulfillment processes, and manage AWS S3 cloud media assets.

Vactors

Senior Frontend Developer

January 2025 - Present (1 year 6 months)

Ho Chi Minh City, Vietnam

- Developed the front-end architecture for a collaborative voice-reading platform utilizing Next.js 14, React 18, and TypeScript for optimized SEO, performance, and type safety.
- Implemented efficient server-state management and asynchronous data fetching using React Query, ensuring seamless audio playback and script loading.
- Engineered dynamic, responsive user interfaces by integrating Material UI (MUI), Emotion, and React Bootstrap, delivering a polished, studio-like experience directly in the browser.
- Built complex, accessible forms for user authentication, event registration, and script creation using Formik and Yup for strict schema-based validation.
- Managed secure user sessions and authentication state using js-cookie and custom React Contexts.

KMS Technology, Inc.

Senior Software Engineer Technical Lead

July 2018 - Present (8 years)

Ho Chi Minh City, Vietnam

TIKI Corporation

Senior Software Engineer

September 2016 - July 2018 (1 year 11 months)

Ho Chi Minh City, Vietnam

I worked on the E-Commerce Platform as a Senior Software Engineer

The products involved:

- Order Fulfillment (Inventory Management)
- Stock Inventory synchronization on the statuses of stock pickings/moves (Inventory Management)
- Promotion management UI tool for user
- Invoice process system (accounting) using Odoo ERP
- Purchase Order process system
- Receive/ process returned orders/merchandise

Skill set utilized: Laravel/Phalcon Open ERP (Odoo),

JS/Webpack/Yarn/React/Redux, Ant Design, Kafka/RabbitMQ,

Jenkins, pure Python. JIRA/Confluence, PyCharm, DataGrid, Bitbucket,

GitHub, Kafka Tool

My responsibilities was to:

- Made the detailed designs for assigned tasks
- Wrote code based on detailed designs and Functional/Requirement Specifications
- Performed full unit test on the assigned tasks
- Implemented unit test
- Incident and bug fixed

NashTech Limited

Back End Developer

September 2014 - September 2016 (2 years 1 month)

Ho Chi Minh City, Vietnam

I Worked with US Jordan Media ODC as a Software Engineer

It is a Gift Card Management System allows customers to manage the loading of their gift cards, without the retailer losing financial control

Skill set utilized: Python/Django, HTML, JavaScript, MySQL, JIRA/Confluence, PyCharm, DataGrid, Bitbucket

EyePower Games Pte Ltd

Senior Software Engineer

July 2012 - September 2015 (3 years 3 months)

Ho Chi Minh City, Vietnam

Tandem

Senior Software Engineer

The game with role-play as agents in a special task force and must relay information via handsets with built-in microphones

Skill set utilized: .NET 3.0, APS.NET MVC, HTML, JavaScript, SQL Server 2000,

Silverlight, WCF

Penguin Adventures

Role: Senior Software Engineer

This game teaches phonics and phonemic awareness and there are lessons as well as mini casual games that learners can play

Skill set utilized: .NET 3.0, APS.NET MVC, HTML, JavaScript, SQL Server 2000,

Silverlight, WCF

Ink2Go

Role Senior Software Engineer

Project description E-Commerce Site for Ink2Go - software for screen annotation

and recording

Industry Utility Application

Project Team Size 10 Members

Skill set utilized - Python, Django, HTML, CSS, Javascript, MySQL

- Komodo IDE, Workbench

Moo-O

Senior Software Engineer

Portal website for Moo-O - a flagship product of Eye Power Games designed to motivate children to learn through play and to read through the power of immersive technology. With the help of a webcam, a microphone and Moo-O software, children (the story readers) are instantly transformed into the characters of the story that they are reading

Skill set utilized: Python, Django/Rest Framework, HTML, JavaScript, MySQL, ReactJS/Redux, Trello, PyCharm, DataGrid, Github, CircleCI

NewsMaker

Senior Software Engineer

Web portal for NewsMaker - Software that provides students an easy, affordable and funny platform to practice their language skills: Reading and Viewing, Writing, Listening and Speaking

Skill set utilized: - Python, Django/Rest Framework, HTML, JavaScript, MySQL,

ReactJS/Redux, SASS, Trello, PyCharm, DataGrid, GitHub, CircleCI

Gold Start Soft

Developer

September 2009 - July 2012 (2 years 11 months)

Ho Chi Minh City, Vietnam

Business portfolio website projects

Software Engineer

Consulted and provided the solutions and plans of developing the business website on customer's demands, advertise their products and maximize their profits

Skill set utilized - .NET 3.0, APS.NET MVC, HTML, JavaScript, SQL Server 2000, VS 2005, TortoiseSVN (version control), Visio 2000

I Approached Clients' requirements, helped team analyze and plan the development progress

- Built the features of the website and applied unit test
- Attended maintenance and fixing issues on customer's feedbacks
